

Amendments to and Listing of the Claims:

1-35. Cancelled.

36. (Currently amended) A cutting tool adjustment system comprising a body for adjustably holding a metal cutting tool, a metal cutting tool held in the body, adjustment means mechanically releasably engageable with the body for positionally adjusting a cutting edge of the cutting tool, and means electronically releasably engageable with the body and including power supply means for at least powering means providing information as to adjustment made, in use, to said cutting edge position by said adjustment means.

37. (Previously presented) The system as claimed in Claim 36, wherein the means providing information as to the adjustment made to the cutting tool edge position is a visual display.

38. (Previously presented) The system as claimed in Claim 37, wherein the visual display is an electronic display.

39. (Previously presented) The system as claimed in Claim 38 wherein the visual display is part of the means electronically releasably engageable with the body.

40. (Previously presented) The system as claimed in Claim 39, wherein the visual display shows the adjustment as the adjustment means is operated.

41. (Previously presented) The system as claimed in Claim 39, wherein the visual display shows a pre-programmed amount of adjustment.

42. (Previously presented) The system as claimed in Claim 41, wherein the adjustment means is motor driven and the pre-programmed amount of adjustment is effected automatically upon engagement of the electronically engageable means with the body.
